

### Automatic Metallographic Specimen Grinding and Polishing Machine

#### Brief Introduction:

LMP-3S automatic metallographic sample grinding and polishing machine is a double-discs desktop machine, which is multi-purpose for one machine.

The whole process of rough grinding, fine grinding and fine polishing of metallographic samples is the ideal equipment for enterprises and scientific research institutes.

#### Technical Data:

polishing disc diameter	Ø250mm (Optional 203mm, 300mm)
Power supply	AC220V/50HZ
Dimensions	980x920x470mm
Weight	100kg
Speed	50-1000rpm
Power	870W
Loading range	5-60N-Manual compression
Specimen Quantity	6pcs
Time Set Range	0-3000s
Sample diameter	φ30mm (Optional: φ22mm/φ45mm)
